

**cymtrix training systems Ltd**

This is our premier single license training course in the **Cymtrix® Director** product range. It comprises of 14 lesson modules. It also has a comprehensive set of course notes which form part of the product. Learners will not gain maximum benefit from undertaking this course without doing some additional private study.

### ***Course Structure and Inclusions***

Cymtrix® Director Executive has 3 major components. Firstly, there is a software and content component which contains all the presentation slides and associated audio narratives and commentaries. Then there is also an optional test quiz for each lesson module. It will take about 8 hours just to go through an uninterrupted presentation of the training course's 14 lesson modules. The third major component is the lesson notes. Private reading time must also be allocated to read through these extensive skills development notes.

### ***Test Quizzes***

All test quizzes can be undertaken as an option for learners. If attempted, each test quiz does have a minimum pass mark of 70%. Results are provided after each test quiz has been completed. Learners can undertake test quizzes when and as often as desired. It is not recommended to rely solely on that which can be learned just from the presentation material. The training course has been designed for learners to read (maybe a few times over) the comprehensive training course notes provided along with the presentation component.

### ***Suitability***

The **Cymtrix® Director Executive** leadership skills development training program has been designed to firstly establish a standardised knowledge foundation. From this point onwards you can start to build and further develop the necessary soft skill sets and behaviours. Cymtrix® Director Executive is suitable for those who wish to develop a comprehensive set of soft skills and behaviours.

### ***Applicable Industries***

All Cymtrix Training Systems courses provide generic skill sets development, independent of any specific industry or organizational requirement; however, they are applicable to and transferable across most industries sectors and organizations.

### ***Best Learning Outcomes***

The best learning outcomes can only be realised when the learner is prepared to read and continually refer to the comprehensive course notes that are supplied with the training course. It is imperative to practise the described behaviours. When adopting this recommendation, best practices will and do become instinctive thus making the individual more productive.

### ***What We Concentrate On***

We do teach some academic theory in our training courses; however, we concentrate upon imparting useable, practical skills development techniques, as well as giving simple examples of desirable behaviours. These practical skills often come with ready reference lists of "do's" and "don'ts". All Cymtrix® Director training courses, do, of course, explain the reasoning behind such teachings!

### ***Our Differential Edge***

All the practical lessons and advice contained in all the Cymtrix® Director training courses has been compiled from the knowledge banks and experience of many former and still practising business executives. This provides all learners a readily useable and proven set of tools, which they can confidently rely upon.

### ***Lesson Notes***

At Cymtrix Training Systems we want all our learners to have the best possible set of tools available to them. Our training course notes and reference material has on many occasions, been complimented on. All Cymtrix® Director training courses have a comprehensive set of learner notes covering all course lesson subjects and topics. They are a valued set of reference tools.
